

Workshop

with Soraia & Tina

Spirit of DIVINITY

- Healing Prayers
- Sound & Chanting as a Prayer
- Personal Treatment from a Medium/Healer
- Nature & Movements

*One pure moment has the
power to create infinite love*

We all want abundance:

But transformation is often hindered by the lingering effects of emotionally charged traumatic experiences. Emotions such as fear, shame and self-rejection, ... are energetic blockages that ultimately cause disease.

Change the wiring of your brain and get into power:

- Learn how to create your own positive energy field
- learn the art of liberating and healing yourself with divine vibrations of LOVE
- learn the vibrational medicine of music & chanting for the soul
- remove emotional imprints and blockages from past lives with a personalised treatment from a medium/healer
- connecting with nature, singing/humming does not only reduce stress but also promotes mindfulness

Say "Yes!" to the Spirit.

*Walk in love, leave
fear & judgement behind*

HEALING PRAYERS

You will learn how to use ancient healing prayers to dissolve old neural pathways and truly renew your spirit. You consciously discover your inner realm, the magic of DIVINE LOVE. The SPACE that is peace, love and energy, where you are ONE.

Calling upon the energy of the Great Masters, the Angels and the Higher Beings is powerful work. You learn how to implement it in your everyday life.

This tool is about vibration and energy that renews life and certainly not about religion. Names such as God, Higher Self, Creative Power, Jesus Christ, Krishna, Jehovah are names of the ONE and SAME. You connect with the energy you love - whatever resonates with you or feels good to you.

*A walk in Nature walks
the soul back home.*

NATURE AND MOVEMENTS

Do you feel like you're falling behind or drowning in your commitments and responsibilities? Are you worried that you are not being the best parent, employee, spouse or self you can be?

By reconnecting with nature in a spiritual way, you can overcome your fears and become more grounded in your existence. Life is overwhelming, but nature helps us to remember the beauty and serenity of life.

In this workshop we will take a walk together into the forest where we will do yoga. Are you a beginner? No problem ... it's not about perfection, strength and endurance!

And in the woods we humm & chant ... and feel what comes back.

*Om is not just a sound,
vibration or a symbol. It is the entire
cosmos, whatever we can see, touch,
ear and feel.*

Sound & Chanting as a prayer

The voice is a barometer that accurately measures feelings. It is nature's most perfect instrument because it reveals things about us before we recognise them ourselves.

Listen deep inside yourself and experience how sound touches your spirit. Learn how you can heal yourself and the world around you with humming and singing and increase your well-being with healing music.

Experience the vibrations of your voice and discover whether your masculine or feminine side wants to be heard. And find out how you can harmonise spontaneously and playfully with others in song.

Pilgrimages & Retreats, a path to self-discovery

Step by step, your mind becomes calmer, you focus on what is inside you and forget the world around you. You open yourself up to a dialogue with your higher self ... and are able to let go of old patterns and heal them

Program 2024:

Marlene Soraia Basler
Medium, Energy Healer, Coach

I am a clairvoyant, energy healer, medium and coach and firmly believe in the power of the human spirit to grow, transform and create a life of ever-increasing love, connection and joy.

With my gift of clairvoyance, I can recognise blockages that often stem from past lives. This allows clients to recognise where and how they are being held back from experiencing the fullness of life. Through my work and teachings, they learn how emotions, beliefs and limitations can be resolved and restructured.

This process leads to an expanded self-understanding and an expanded experience of life itself. On this new foundation of self-knowledge and empowerment, my clients are able to move forward. To live a life they love.
